Social Media **Marketing** Plan

Twitter —Traffic and Reach

Twitter is used mainly for its ability to move traffic to a site. 90% of the tweets are designed to engage interest and make the click to the site. After that, the site needs to manage the interest and move people to the sale.

- **Twitter will work for you** when you make the tweets as down-home and authentic and as non-sales-y as possible. This is done through quotes from presentations and presenters, images from the site, facts and figures, and conversations.
- What **to Tweet**: teaser text for the products, parts of testimonials, statement of benefits, vocabulary that captures the voice of your company, 80% with links.
- **Voice**: The most important part to **define is the “voice” of the tweets**; highly energetic, forceful, sweet, etc. The voicing will be the emotional mover in the tweet creation process.
- **A global list of hashtags** will be developed that will increase the reach of each tweet beyond the Followers of the accounts.
- **A collection of tweets** (50) and the instructions on how to vary them will be **developed**. Each tweet will include links and hashtags. This excel file will be available for all principals and supports to use in any marketing campaigns.

The most important about using Twitter for marketing is the voicing, frequency and landing pages the tweets take people to.

Strategy in a nutshell:

- tweet at least **50 times a week** on all designated accounts (TBD)
- tweet during **peak online attention** of targeted potential customers
- use **the top hashtags for the product** in most tweets

Facebook—Targeted Connections Contests

Facebook can be an amazing space; if you have a clear idea of what brings people together, what people love to share and where you want them to go and how to get them there.

What brings people together: common pain, common solutions, sense of shared traits, common purpose.

What people love to share: beautiful images, quotes, human faces, funny text/images/stories, powerful statements by celebrities, offers and discounts.

Where do you want them to go: always take them to a place that solves their problem, sales page, video page.

- **Promoted Posts** will be very important to use, but the number of Page likes will need to be increased to at least 200 in order to use that service. I can **develop several posts that would be perfect for Promoted Posts. These can be posted and used anytime.**
- Posting at least twice a day is suggested. **I can develop the posts and schedule them to post at high traffic times on Facebook.**
- **Facebook ads** that are **targeted to a targeted audience** would be great, if the budget allows. **I can create and manage an ad campaign for you.** The costs of the ads are not part of the fee for creating the marketing plan, but **managing** a campaign is included.

Strategy in a nutshell: The focus of this phase is to **expand your target market** on Facebook using a **re-occurring contest** strategy. These contests can be targeted to your top target locations or demographics. This process will give you more Page Likes and more engagement on the Page and **more traffic to your website.**

YouTube—SEO

The main reason you want to be on YouTube is the SEO benefit. Several videos need to be developed to use all the targeted keywords you want to own for this program. These videos do not need to be on-camera interviews. The videos can be presentations, ads, testimonials with static images etc.

YouTube can be an amazing space if you provide an **entertaining, professional and highly optimized video channel.**

Entertaining: Please make sure there is an element of entertainment woven into every video you create.

Professional: Your Channel needs to be beautiful and match the quality of your website. You will need to put some attention on the social aspect to really gain the most from this social site.

Strategy in a nutshell:

- The focus of this phase is to **use the second largest search engine to expand your target market** and bring them directly to your website.
